The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2.Claims 1-9, 12, 14-16, 18-24 and 27-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pekar (5,638,565) in view of Evans (4,864,671) as set forth in the previous Office action.

3.Applicant's arguments filed February 27, 2006 have been fully considered but they are not persuasive. Applicant focuses on the disclosure of Evans at column 4, lines 25-35 and then argues that Evans does not describe or suggest forming a base layer unitarily with a plurality of cells that extend outwardly from the base layer via an injection molding process, but teaches a conventional method instead. The examiner disagrees because it is the examiner's position that the Pekar reference provides the suggestion to one of ordinary skill of forming a first layer unitarily with a plurality of hollow cells that extend outwardly from the first layer and are each coupled together in flow communication, as in instant claim 1. To any extent that "integrally" in claim 24 is to be interpreted differently than "unitarily" in claim 1, it is also the examiner's position that the Pekar reference provides the suggestion to one of ordinary skill in the art of forming a flexible base such that a plurality of hollow cells formed integrally with the base extend outwardly from the base and are coupled together in flow communication.

With regard to claim 12, Applicant argues that in contrast to the present invention, Pekar describes a cellular cushion wherein the conduits between adjacent

cushion cells are sized with a predetermined diameter that controls the fluid flow rate between the cells of the cushion. But to the examiner, the sizing of the conduits of Pekar constitute a plurality of fluid control devices, as required by claim 12.

4.**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5.Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Kuhns whose telephone number is (571) 272-1202. The examiner can normally be reached on Monday to Thursday from 7:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaianni, can be reached on (571) 272-1196. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
